YEAR 9, 2026 ASSESSMENT POLICY

Some Important Considerations

Stage 5 Assessment Policy

The purpose of assessment is to assist student learning, determine a student's achievement in a course, evaluate and improve teaching and learning programs and provide evidence of satisfactory completion of courses.

NSW Education Standards Authority (NESA) has advocated 'assessment for learning' not just assessment for accountability. Assessment that enhances learning recognises that learners use their current understanding to discover, construct and incorporate new skills, knowledge and understanding. Assessment for learning helps teachers and students to know whether that current understanding is a suitable basis for future learning (NSW Board of Studies, 2003).

Assessment for learning encourages self assessment and peer assessment. Students can develop and use strategies that allow them to actively monitor and evaluate their own learning and the learning strategies they use.

Formal assessment is based on a standards-referenced framework. There are significant benefits for student learning in using this approach. Learning is enhanced when students have a clear understanding of what is expected of them. It is important that students understand what is to be learned and the level of achievement that they will need to demonstrate. A standards-referenced approach provides the means by which students know what they are expected to learn and the standards against which they will be assessed.

Record of School Achievement (RoSA)

At the completion of the Stage 5 assessment program, the Headmaster will certify the subjects that students have satisfactorily completed.

Students who have satisfactorily completed the course requirements for Stage 5 Courses will be eligible to commence Stage 6 Courses in the following year.

Students who leave the College before receiving their Higher School Certificate (HSC) will receive

the NSW Record of School Achievement (RoSA) as long as they meet the eligibility requirements.

The RoSA is a cumulative credential in that it allows students to accumulate their academic results until they leave school. The RoSA records completed Stage 5 and Preliminary Stage 6 courses and grades, and participation in any uncompleted Preliminary Stage 6 courses.

The College is responsible for awarding each student who completes a Stage 5 course or a Stage 6 Preliminary course (except Life Skills and VET courses) a grade to represent

Year 9 and Year 10 (Stage 5) Guidelines for Assessment

Allocation of Grades

Schools are responsible for awarding each student who completes a Stage 5 course (except Life Skills and VET courses) a grade to represent that student's achievement. The grade is reported on the student's RoSA (Record of Student Achievement).

Grading student achievement is the process of assigning a letter (A, B, C, D or E) to summarise the student's level of achievement. In Mathematics, grades have been further differentiated to nine levels as follows: A10, A9, B8, B7, C6, C5, D4, D3, E2. These grades are reflected in the College's reporting to parents as well as recording student performance in RoSA.

The choice of a particular grade will be made on the basis that provides the best overall description of the student's achievement of the syllabus stage outcomes. For each course, formal assessment marks or indicators of performance from assessment of learning tasks and assessment for learning tasks will be linked to the student's overall performance and the specific Course Performance Descriptors.

Course Performance Descriptors describe the main features of a typical student's performance at each grade measured against the syllabus objectives and outcomes for the course.

The general performance descriptors, below, only give an overall view and description of performance at each of five grade levels. Some courses have course specific descriptors.

A	The student has an extensive knowledge and understanding of the content and can readily apply this knowledge. In addition, the student has achieved a very high level of competence in the processes and skills and can apply these skills to new situations.
B	The student has a thorough knowledge and understanding of the content and a high level of competence in the processes and skills. In addition, the student is able to apply this knowledge and these skills to most situations.
C	The student has a sound knowledge and understanding of the main areas of content and has achieved an adequate level of competence in the processes and skills.
D	The student has a basic knowledge and understanding of the content and has achieved a limited level of competence in the processes and skills.
E	The student has an elementary knowledge and understanding in few areas of the content and has achieved very limited competence in some of the processes and skills.

The Process used for Determining Grades

1. Establish an assessment program that consists of a number of assessment activities.
2. Ensure that the assessment activities cover the full range of outcomes.
3. Determine the weightings or relative importance of each activity.
4. Collect performance information on each student from assessment activities. Letters, symbols or descriptive comments may be recorded for some or all assessment activities.
5. Assemble the information on each student from the assessment activities to provide an

overall picture of the student's achievement.

6. Make an on-balance professional judgement matching the overall picture of each student's achievements to the most appropriate description indicated in the Common Grade Scale. Appropriate description indicated in the Common Grade Scale.
7. Review the grade awarded to each student to make sure that no anomaly has occurred.
8. Work Samples will be collected to assist teachers to moderate the grades they award to students by comparing the standards of work published with those produced by their students in the same or similar course.

Making an On-Balance Professional Judgement

- Judgements are made by taking into account strengths and weaknesses in performance across a range of contexts and over a period of time, gathering evidence on a number of assessment activities.
- When deciding the number and type of assessment activities, the emphasis should be on the nature and the quality rather than the amount of evidence
- Assessment activities should give the students opportunities to show what they know and can do.
- Opportunities should be given to students to display their achievements in different ways and to work in a range of situations.
- A single piece of work will not cover all aspects of the grade description. Using a single piece of work to make a judgement is therefore not as valid and reliable as an 'on-balance' judgement.
- Each grade description should be considered alongside descriptions for adjacent grades.

Submission of Tasks

Assessment tasks must be submitted or carried out on the due date. It is expected that tasks will be handed to the class teacher (or the Leader of Learning in the absence of the teacher) during the timetabled period of that course or at the time indicated by the class teacher when the notice of the assessment task was given. Tasks submitted through Canvas are to be uploaded within the timeframe indicated by the teacher.

Students who are absent the day before an assessment task is due may be asked to provide documentary evidence.

Absence on the day the task is due will require appropriate evidence (Medical Certificate) submitted to the relevant Leader of Learning.

Assessment Free Period

Assessment tasks should not be set or due during an examination period or one week before the Yearly Examination period.

Referencing Sources for Research

Assignment

All students are required to reference material from other sources that are used in Research tasks. Students need to be taught this process and given directions using the resources on the College IRC website.

Illness and Misadventure

Where a student is unable to sit for, or complete a task due to illness or misadventure; one of two options will be followed depending on the subject and the circumstances:

1. an alternative task will be provided when the student is able.
2. an estimate of the student's performance will be based on previous performances of the student.

Where a student is unable to complete or sit for a task due to illness or misadventure, the student will need to provide documentary evidence for the reason. This will require a written explanation from the parents and necessary documents, such as a medical certificate.

Extensions, Overdue Penalties and Cheating

- Students with legitimate reasons may seek an extension **before** the due date of the task. Requests for extensions should be made in writing to the relevant Leader of Learning.
- Failure to submit formal tasks by the due date (without legitimate reasons) will incur a penalty of 20% for each day late (40% for weekends) of the mark received.
- In cases where assessment tasks are late the teacher will enter a diary comment for parents. Further failure to submit the task will result in the teacher, or Leader of Learning, calling home and a NESAs

Warning Letter being issued. Students are required to submit tasks even if a zero mark is awarded to meet completion criteria.

- Students will need to complete the task during homework detention. If after 1 week the task is still incomplete, students will be required to attend after school Homework Club to complete the task.

Note: Homework Club runs one afternoon per week from 3.00 pm – 4.15 pm and is supervised by staff.

- The penalty imposed on students who are found to be plagiarising others work, making non serious attempts or cheating in tasks will be awarded a **zero mark** These cases should be directed to the Director of Teaching and Learning 7-12 for a final decision.
- The use of mobile phones or any other electronic device during an assessment task, other than a NESAs approved calculator, will be deemed as cheating.

NESA Warning Letter

A NESAs Warning Letter will be sent to parents for student breaches in the procedures regarding the following:

- illness and/or misadventure and overdue submissions of work.
- cheating.
- insufficient evidence of a student to applying themselves with diligence and sustained effort to the set tasks and experiences provided in the course by the College.
- insufficient evidence that a student has achieve all or some of the course outcomes.

After two warning letters are sent home for a particular course, the Director of Teaching with the Teaching Learning Coordinator will request an interview with the parents. The parents will be informed of the likelihood of an 'N' Determination for that student in the course if the issues regarding the student's performance are not addressed. Further breaches or failure to comply with an agreed course of action will lead to the issuing an 'N' Determination.

Appeals

Parents are able to appeal the decision to issue an 'N' determination. Procedures are outlined in the NESAs ACE Manual. Students may appeal the marks or grades they receive if there are

inconsistencies in the assessment or marking process. This must be in writing and directed to the Leader of Learning for consideration. If there is not a satisfactory resolution, then further appeals can be made to the Director of Teaching and Learning 7-12.

Monitoring

Class teachers are responsible for monitoring student progress throughout each course. This includes tracking student performance across assessment tasks and formative activities, and using this information to inform teaching and provide feedback to students.

Student progress is monitored against course outcomes and recorded on Edumate to ensure an accurate and ongoing record of achievement. Where a student's performance indicates they are at risk of not meeting course requirements, the class teacher will notify the Leader of Learning and appropriate intervention strategies will be implemented along with communication to parents.

Leaders of Learning oversee the monitoring of student progress across classes in their faculty to ensure consistency in assessment practices and to support students in meeting course requirements.

Recording

The Leader of Learning will keep a copy of assessment tasks given to students. After the task is marked the class teacher is required to keep a record of the marks obtained by each student and an indication of the outcomes achieved by the student in the task. Students may request their rank in each assessment task. Each Leader of Learning is to keep a printed copy of raw marks, obtained by students for each assessment task. The set of marks for each assessment task is to be recorded on Edumate and a copy will also be kept with the Director of Teaching & Learning.

Reporting

Student will receive information on their progress through the College reporting process. As well as receiving an Achievement Grade indicating their progress in each course, students will also receive an application grade based on the following criteria:

- Completes set work and participates in lessons as directed by the teacher.
- Demonstrates the characteristics of a reflective learner.
- Demonstrates the characteristics of a motivated learner.

- Chooses appropriate behaviour in the classroom.
- Is well organised and prepared for class.

Students receive a written report at the end of each Semester.

Academic Awards

At completion of Semester 1 and at the end of the Academic year, awards for each course and overall academic excellence are presented at Formal Assemblies and Presentation Evenings. To be eligible to receive an academic award, students will need to have demonstrated diligence and sustained effort to all aspects of their studies. Students will need to have completed all assessment items in the course. Typically, a student would need to demonstrate consistently high levels of application on their report (see criteria under 'reporting').

The awards that are presented include:

Semester 1 Academic Awards

Academic Excellence – Awarded to two students who have demonstrated high levels of personal achievement, as well as diligence and sustained effort across all subject areas in Semester 1.

Yearly Academic Awards

Academic Medallion – Awarded to the two top performing student in each year group across all subject areas. Also known as Academic Excellence awards.

Academic Dux – Awarded to the top performing student at the completion of each stage of learning (Stage 4 - Year 8, Stage 5 – Year 10, Stage 6 Year 12).

Academic Improvement – Awarded to the student in each year group who has shown the greatest improvement over the academic year.

Places in Course – Awarded to the 1st, 2nd and 3rd place getters in each course who have completed all assessment items.
